Global Economic Growth

Growth trajectory in developed economies

Growth projections for 2026

- US economy dropped to 1.5% in Q2CY26, against 2.1% in Q1CY26
- Eurozone economy expanded 0.4% in Q2CY26, compared with flattish growth in Q1CY26
- UK GDP grew 0.9% on-year in Q1CY26, matching the pace recorded in Q4CY25

Global Central Bank Highlights

*Data as on July 29, 2026. Source: Crisil Intelligence.

- Fed left its interest rates unchanged at 3.50-3.75% at its Jul-26 meeting, marking fifth consecutive pause
- ECB kept its key interest rates unchanged at its Jul-26 meeting, maintaining deposit facility rate at 2.25%, main refinancing operations rate at 2.40% and marginal lending facility rate at 2.65%
- BoE kept interest rates unchanged at 3.75% in Jun-26. Officials cautioned that persistent energy costs, potential wage-price pressures, cooling economy and labour market could influence future inflation trends
- PBoC maintained the 1-year and 5-year LPR at a record low of 3% and 3.5%, respectively for a 14th consecutive month in its Jul-26 meeting

Global Bond Yields

*Data as on July 28. Source: Crisil Intelligence

- Resilient US economic data, elevated crude oil prices and expectations that the US Fed would keep interest rates higher for longer helped the yield on the US 10-year Treasury close at 4.61% on July 28, 2026 up from 4.44% on June 30, 2026
- Early in Jul-26, the benchmark yield rose on the back of a stronger-than-expected job growth print as per the Jun-26 nonfarm payroll report and a return to expansionary zone of the ISM Services PMI in June. Rising crude oil prices also fuelled inflation concerns, prompting investors to scale back expectations of a Fed rate cut in the near term.
- Mid-month, yields remained elevated after the Jun-26 CPI print highlighted persistent inflationary pressures and June retail sales and industrial production pointed to continued economic resilience. Elevated crude oil prices further reinforced concerns that inflation could trend above the Fed's target over the near term.
- Towards the end of the month, the benchmark yield rose further as the Jul-26 S&P Global Flash PMI signalled continued expansion in business activity and expectations of further Treasury issuances increased. Also, maintaining upward pressure on the long-term yield were a widening fiscal deficit and expectations of the Fed's cautious policy stance.
- A further rise in the yield, though, was curtailed as easing geopolitical concerns halted the increase in crude oil prices, thereby cooling inflationary concerns.

GDP growth projections for 2026

- India's gross domestic product (GDP) grew 7.8% on-year in Q4FY26, compared with an upwardly revised 8.0% in Q3FY26
- In terms of gross value added, the economy grew 7.9%, compared with 8.0%

Industry	Q4FY26 Growth %	Q3FY26 Growth %
Agriculture, Forestry & Fishing	3.6	1.7
Mining & Quarrying	5.4	4.7
Manufacturing	7.3	12.8

Trade, Hotels, Transport, Communication & Services related to Broadcasting	12.5	11.2
Financial, Real Estate & Professional Services	10.4	11.6
Public Administration, Defense & Other Services	5.8	4.9

- GDP is expected to grow at 6.6% on-year in FY27, compared with 7.7% in FY26. Higher input cost pressures, forecast of a below normal southwest monsoon due to El Niño and softer global growth are expected to impact growth. However, relative resilience in consumption demand and continued government capital expenditure are expected to support growth
- A sharp rise in energy and other input costs is expected to be passed on by producers to consumers, raising core inflation. Below-normal rainfall amid El Nino conditions and heatwaves during summer are expected to put pressure on food inflation

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

*MF data is as on July 24, 2026. Source: NSE, BSE, SEBI, NSDL (as on July 29, 2026)

- Indian equities ended in Jul-26 positively, benchmark indices closing higher against Jun-26, supported by domestic resilience and intermittent improvement in global cues through the month, despite volatility
- The market was influenced by a combination of global developments, including West Asia, fluctuations in crude oil prices and evolving expectations pertaining to central bank policies across the globe, alongside domestic factors such as earnings expectations and investor inflows. BSE Sensex rose 2.03% to 78,034 in Jul-26 from 76,478.67 in Jun-26, while the Nifty 50 gained 2.17% to reach 24,383.60 from 23,865.75, reflecting a largely rangebound market with an upward bias
- Market sentiment was supported by easing crude oil prices in parts of the month, optimism surrounding a potential India-US trade agreement and expectations of an accommodative global interest rate environment. Investors were also encouraged by the start of earnings season for Q1FY27, while resilient domestic fundamentals helped sustain market confidence.
- FPIs turned net buyers in Jul-26, purchasing Rs 202 billion worth of equities, compared with net selling of Rs 493.40 billion in Jun-26, indicating an improvement in foreign investor sentiment. DIIs continued to support the market as they picked up Rs 337.05 billion worth of equities in Jun-26, although lower than purchases worth Rs 858.00 billion in Jun-26, providing sustained liquidity to Indian equities
- Sectoral performance was mixed, with BSE Information Technology (16.3%), BSE Teck (11.8%) and BSE Realty (10.7%) emerging as top gainers, driven by earnings optimism, an improving demand outlook and support from expectations of a softer interest rate environment. Among the laggards, BSE Capital Goods and BSE Power declined 6.5% each, due to profit booking and investor caution, amid prevailing macroeconomic uncertainties
- Overall, supportive domestic factors, optimism over earnings and improving global cues helped Indian equities deliver positive monthly returns, offsetting the impact of geopolitical uncertainty, commodity price volatility and policy-related uncertainties

Equity Market Outlook

Global Update: In July 2026, the S&P 500 and Nasdaq 100 experienced severe volatility, marked by semiconductor sell-offs, status quo on Federal Reserve rate decision amid rising Treasury yields, and choppy tech earnings. The S&P 500 index fell 0.1% and Nasdaq 100 fell 6.6% in July 2026.

In the UK, the FTSE 100 showed a resilient upward trajectory because of strength in its energy, mining and banking constituents, which benefited from higher oil prices and a run of stronger than expected earnings. The index rose 3.5% in July 2026.

The STOXX 600 achieved its fourth consecutive monthly gain, driven by artificial intelligence optimism, resilient corporate earnings, and global technology rallies. The pan-European benchmark Stoxx600 index closed 1.2% higher in July 2026.

China's equity market barometer index, Shanghai Composite, declined by roughly 6.4% in July 2026. This downward movement was driven by weak domestic manufacturing data, contracting factory activity, and global technology sector volatility.

Japan's Nikkei 225 declined 8.1% in July 2026 primarily due to a global selloff in artificial intelligence and semiconductor stocks, a stronger yen, and rising geopolitical tensions.

India Update: Indian equities rallied during the month due to surge in technology sector, renewed foreign institutional buying, and solid corporate earnings. The Sensex rose 2.1% whereas the Nifty50 rose 2.2% in July 2026. FPIs bought Rs.20,220 crore in July 2026 compared to outflow of Rs.49,340 crore in June 2026. (Source: NSDL)

Sector-wise, BSE Capital Goods (-5.4%), BSE Power (-5.3%) and BSE Bankex (-0.2%) were laggards, whereas, BSE Infotech (+14.7%), BSE Consumer Durables (+9.3%) and BSE Realty (+8.6%) gained the most. (Source: BSE)

Our view going forward:

- Although Indian markets rallied in July 2026, they continue to remain volatile given – a) sharp swings in crude oil prices due to renewed tensions between US & Iran b) uncertainty around US Fed communication c) Rupee staying at the weaker end.
- Performance during the month, was largely driven by rotation into India due to the Global AI de-risking phase.
- On the macro front, the Rupee has depreciated ~10% in last one year, making it an undervalued currency. Concerns around Current Account Balance eased a bit as Mar-2026 quarter saw a surplus at 0.7% of GDP.
- India's GDP numbers were resilient for FY25-26 as it accelerated to 7.7% in FY26 (vs 7.1% in FY25) reflecting stronger economic activity.
- Other macro indicators too remain robust – Fiscal Deficit is under control, demand environment is good, in the current fiscal, Govt. has kick started capex on a high note and earnings are resilient in the wake of geo-political tensions
- These factors bode well for long term prospects of the economy and markets
- However, in the near term we believe markets will be volatile as the uncertainty around the conclusion of US-Iran war remains high. Also, other triggers which may impact markets in near term include a heavy domestic IPO market and elevated global valuations driven by AI rally
- Equity valuations continue to remain in neutral zone currently. We continue recommending investing in equities in a staggered manner through SIP/STP in schemes that have the flexibility to maneuver across sectors / market cap.
- Since market volatility may persist in the near term, we also continue to recommend investing in Hybrid / Asset Allocation schemes.

Liquidity in the banking system

Data as on July 28. Source: RBI

- The benchmark 10-year government security yield ended the month largely unchanged at 6.80% on July 29, 2026, compared with 6.77% at the end of Jun-26. The domestic bond market remained rangebound for most of the month, as concerns around inflation and global developments were broadly balanced by strong demand for government securities from both domestic and foreign investors
- In the first half of Jul-26, benchmark yields moved in a narrow range, supported by steady investor demand for G-secs and healthy participation in primary auctions. Continued foreign investor interest in fully accessible route securities, coupled with expectations that the RBI would maintain the policy repo rate at 5.25%, provided stability to the market, despite intermittent global uncertainties. The inclusion of domestic bond in global diversified index also boosted the sentiments.
- FPIs remained net buyers in the debt segment up to 29 July 2026, with net inflows of Rs 24,328 crore, driven by purchases worth Rs 29,103 crore under the General Limit and Rs 6,898 crore under the Fully Accessible Route, partially offset by outflows of Rs 11,673 crore from the Voluntary Retention Route.
- As the month progressed, yields experienced upward pressure amid an intermittent rise in global crude oil prices and heightened geopolitical uncertainty. These developments revived concerns about rising imported inflation and its potential impact on India's inflation trajectory.
- Market sentiment turned cautious following the release of June inflation data, which showed an acceleration in the CPI-based inflation to 4.3% on-year from 3.2% in May, driven largely by higher food prices. The increase in inflation reinforced expectations about caution regarding any further monetary policy easing. As a result, investors demanded a modestly higher risk premium, leading to some volatility in benchmark bond yields during the latter part of the month
- Towards the end of July, bond market sentiment improved as crude oil prices moderated on signs of easing geopolitical uncertainty and concerns over imported inflation. Simultaneously, comfortable banking system liquidity, demand from DIIs and expectations of policy rate stability supported the G-sec market. Consequently, the benchmark 10-year G-Sec yield ended the month marginally higher than its level at the end of June
- Overall, yield remained resilient during the month. While inflationary concerns and global developments periodically influenced investor sentiment, strong demand for G-secs, supportive liquidity conditions and expectations of a stable monetary policy environment helped anchor yields and preserve market stability.
- Meanwhile, investors will focus on closely monitor the RBI's Monetary Policy Committee meeting for guidance on interest rates and the liquidity outlook. Investors will also focus on the government's September borrowing calendar, the RBI's liquidity management measures, and key domestic economic indicators such as July CPI and WPI inflation.

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

In July 2026, fixed income yields experienced a sharp increase, driven by rising global bond rates, concerns over domestic inflation stemming from higher crude oil prices, and shifting foreign investor flows. Despite this, credit growth has remained robust, and if economic growth continues on its upward trajectory, we expect the output gap to narrow.

The recent postponement of G-sec bond inclusion in global indexes has reduced the likelihood of a G-sec rally in the near term. On the positive side, however, the Reserve Bank of India's measures aimed at attracting NRI deposits and covering hedging costs for banks are anticipated to generate significant deposits for banks and improve liquidity conditions. The measures may cap risk premiums on yields in the short term, resulting in a generally positive outlook for debt markets.

That said, we believe that much of the easing in yields may already be behind us. Therefore, we advise investors to avoid making aggressive long-term duration bets. Instead, the focus should be on steady carry, capital preservation, and risk-adjusted returns.

Within the fixed income market, we favor corporate bonds in the 1- to 3-year duration range. On the sovereign side, we maintain a positive outlook on long-dated State Government Securities. Consequently, we recommend investment in short-term products, corporate bonds, floating interest instruments, and banking and PSU debt in the current environment.

Market Activity

The 10-year Indian benchmark bond yield rose to 6.83% on July 31, 2026, up 7 bps compared to 6.76% as on June 30, 2026.

Liquidity conditions were generally in surplus during the month. The 91-day T-bill yield rose 10 bps on-month to 5.34% whereas the 182-day T-bill rose 17 bps to 5.59%. (Source: CCIL)

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 31 July 2026

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. For complete IDCW history details please refer to our website www.icicipruamc.com, Download section-NAV and IDCW history section.

Distribution of IDCW is subject to availability of distributable surplus and approval of Trustees.

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.
